An

TRIGGE, 1672.

An Astrologo-Physicial Discourse.

**T**hat the pro-dominion of humours, is the immediate cause of diseases; and that the excitation of these humors, is caused by the various and different Aspects and Positions of the Stars is even by Hippocrates and Galen themselves confirmed. Trust we then to these Rules Astrological, to be observed for the advantage for the sick;

Let the	{	Sanguine	{ bleed the	{	♄, or ♀.
		Cholerick			♁, or ♄.
		Phlegmarick			♂, or ☿.
		Melancholy			♊, ☿, or ♄.

But let her be also in the Aspect of the Fortunate Planets, and seated in a fortunate part of Heaven.

It is good to purge with Eleuaries, when the ☾ is in ♁; with Pills, when she is in ♄; with Poisons, when in ♀, because then posited as before directed.

Vomits are unsafe for all sorts of complexions and constitutions; yet sometimes there is a necessity for them; as when the Distemper lyeth above the stomach; it being impossible for a Purge, or any purgative Medicine thence to carry it; but when there is an occasion they may be safely taken when the ☾ is in ♁, ♀, or ♂, in any good Aspect of ♂, ♀, or ☉.

Clysters are most conveniently administered, when the ☾ is in ♀, ☿, or ♀, posited as before.

Good to stop Fluxes, or Rheumes, or Issues, when the ☾ is in any of the Earthly Signs, viz. ♁, ♀, or ♀; of which experience is a valuable witness.

Very proper to Bath, when the ☾ is in ♁, ♊, ☿, or ♄, in Aspect of ♂, or ♀.

Convenient to cut Hair, the ☾ being in ♊, ♂, ☿, or ♄, increasing in Light. And although this be in the opinion of many but a Trivial thing to observe; yet were it more taken notice of by the Gallants of our times, they need not disguise themselves with Venus Locks; But they, it may be, esteem it an Honour to be made amends with a part of her, that Originally injured them.

Medicina a medico; medela ab altissimo.

A

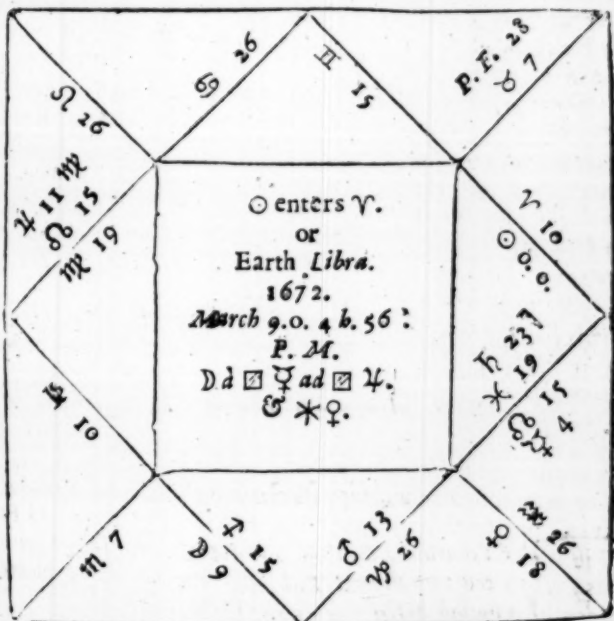

# TRIGGE, 1672.

*An Astrological Description of the four Seasons  
of the Year, 1672.*

## 1. Of the Spring.

**T**HE Spring Season, or *Vernal Equinox*, beginneth at that time the Sun toucheth the first Point of *Aries*; which this Year happens on *March* the 9th. 4 hours 56 Minutes *post Meridiem*, or Afternoon, according to the *Astronomical Tables* in the *Doctrine of Nativities*; the Figure thereof, as it presents it self in the Meridian of the famous City of *London*, is as followeth:

This is somewhat a rugged Position of Heaven, in many respects; as is intimated by *Cauda Draconis*, being so near the Ascendant, and *Saturn* his being in opposition hereunto, and casting his *Platigue Quadrant* to the Mid-Heaven; It

## TRIGGE, 1672.

bodes in the general a discontented Commonalty, murmuring against their Superiors, and an Inclination to cozen and play fast and loose one with another; also many ill marriages, and separations of those that are already married; many Law-Suits, and Controversies, and a desire of men to ruine one another. Many untimely deaths also, and a cutting off divers Offenders by the Hand of Justice and Authority. Many Abortions, and other Diseases in Women. And as here will be much Animosity and Discord between Man and Man, so will there be between Nation and Nation; and consequently many eminent Battels fought, &c. with the besieging of Towns and Castles, &c. Many Diseases in the Bowels, or small Gutts, tormenting Physitians to understand them. But the World being like to be better inform'd of these things by such as have a larger Room allotted them, I shall forbear all further discourse hereof, referring my Reader to them.

This Spring-Season extendeth it self from the beginning of *V* to the beginning of *S*, so that the Sun passing through all *V & II*, maketh the Spring quarter. It is by nature hot and moist, (as must every thing generative be) and is therefore very aptly resembled to Youth, to the sanguine Complexion, and to the Element of Air, as enjoying the same Tempera-  
ture.

The Diseases commonly happening in this Quarter are Feavers, Small Pox, Leprosies, Itch, Plurisies, Sore Eyes, Asthma's, voluntary bleeding: with many other sicknesses proceeding from a corrupted mass of Blood.

### 2. Of the Summer.

**T**HE Summer Season, or *Solstice*, always begins where the *Vernal Equinox* endeth; and takes its Name *ab Æstu*, because of the very great heat which this Season always affordeth, or else it is term'd *Summer*, according to the *Germans*, *quasi Solne Maht*; for then we have *Plus Solis*, a greater portion, and longer stay of the Sun with us, than at any other times of the year. It consisteth of that  
quantity

## TRIGGE, 1672.

quantity of time in which the Sun is running through the Signs  $\odot \Omega \text{M}$ , and is naturally hot and dry, and assimilated to fire among the Elements, to Choler among the humours, and to Manhood in humane Race. This Quarter begins this Year, on *June 10th.* sixteen hours *P. M.* or Afternoon, and is in signification much like unto that of the Vernal Figure.

The Diseases that are principally reigning in mens bodies at this time, are Imposthumes, Pestilential Feavers, Jaundies, Burning Agues, Madnes, Inflammations, with all other weaknesses proceeding from Choler; and therefore all such persons that are Cholerique are at this time most unhealthy. The Flegmaticque person enjoys the greatest freedom from sickness because the powerful heat of the Sun in this Season dries up the superfluous moisture that accusometh to discompose him, but to the Cholerique person, the Sun too potently exhales the radical moisture, leaving the Crasis exceeding sicous and dry, and consequently apt to generate any the forementioned Diseases; extremity of heat, we see, cleaves the stoutest Trees, nay, the Earth it self; and must therefore rack and tear mens bodies that are aptly disposed to its fury, as are the Cholerique persons. And thus much for the Summer Quarter.

### 3. Of Autumn, or Harvest.

**T**HE *Autumnal Equinox*, or third Quarter of the Year, beginneth always when the Sun entrencheth the Celestial Ballance, *Viri Libra*, and continueth all that time he is passing through the Signs of *Libra*, *Scorpio*, and *Sagittary*. And this Year it falls out to be upon *September 12.* some few Minutes before eleven of the Clock in the Morning. I shall forbear all discourses Astrological hereon; and in this place onely acquaint you, that the Autumnal Season is cold and dry, and therefore is very pertinently and truly resembled unto the Humour of Melancholy; to the Earth among the Elements, and to the old declining Age of Mankind.

## TRIGGE, 1672:

The Diseases that are principally observed to torment and discompose men in this Quarter, are pains in the back, darkness of the sight, retention of Urine, also Cankers, Hemorrhoids, Piles, Fistula's, &c. with all other Humors proceeding from that destructive Humor of Melancholly.

### 4. *Of the Winter, or Erumal Quarter.*

**T**HE Hyemnal, or Winter Solstice, always commenceth when the glorious Lamp of Heaven, the Sun, toucheth the first Minute of the Tropical Sign of *Capricorn*, and continueth all that time he is transiting through the Cælestial Signs of ♍, ♎, ♏. And the Annual Circle being thus finished, the Sun mounts the Cælestial *Aries* again, beginning here the Spring of the following Year; All the Seasons, and how they are made, are prettily expressed in this short piece of Poetry.

*Bright Phœbus running his Ecliptique Ring,  
Doth make both Autumn, Winter, Summer, Spring.*

This Winter of this present Year 1672. inchoates on December 10. at eleven hours *post Meridiem*, and hath so odd a Face of Heaven, I mean in signification, that I resolve to transcribe it, and leave the Discovery thereof to abler Pens.

The Season of it self is cold and moist, rain being more frequent now, than at other times of the Year, because the Stars called *Kesil*, or *Orion*, now arise with the Sun, generating Tempests, Storms of Rain, &c. sometimes by the various Configurations of the Planets, this general inclination is overborn, whence we have Frosts, &c. but of it self, it is of this Nature, and not otherwise. And hence it is resembled to Phlegme among the Humors, and to Water among the Elements; and to the last and Oldest, viz the decrepid Age of Mankind.

The Diseases peculiarly incident to this Quarter, are the Tooth-ach, Scabs, Fluxes of blood by the inferior parts, Pusshes in the face, Defluxions and Rhumes, Palsies, Gouts, and all other Diseases proceeding from corrupted Phlegm.

And

## TRIGGE, 1672.

And thus have I presented you with a true Chorography of the four Quarters or Seasons of the Year. I shall in the next place acquaint you with the several Eclipses that happen therein.

### *Of the Luminarian Eclipses that happen in the Year, 1672.*

**T**Here will be four Eclipses this Year; according to the Ephemerides of *John Gadbury*; two of the Sun, and as many of the Moon; whose words thereof I shall make bold to transcribe, it being neither injury to the Author on the one hand, nor an Imposition on the Reader on the other, when I plainly tell them who I make use of.

The first Eclipse is of the Sun, and happens on *February* the 18. about three of the Clock in the Afternoon, but it being a very small partil Eclipse, will scarcely be perceptible, and therefore to insert the Type would be of little use to the Lovers of Astronomy.

The second is an Eclipse of the Moon, and falls on the third day of *March* about two of the Clock in the Afternoon, it is invisible as to us, because celebrated when the Sun is above our Horizon; and the Luminary Eclipsed under the Earth; yet the Eclipse being somewhat large, viz. neer half of the Moons body obscured, I shall take a little notice thereof, viz.

The meridian of this Eclipse is removed from us Eastward 8 Hours, 50 Minutes, in the Longitude of 133 0 15 d. and may be seen in *New Guinea, Japania, Cathaga*, and the Islands and Countrys adjoyning; It is celebrated in the 24. Degree of the Celestial *Virgin*, and its effects relate unto, not onely Persons, but Kingdoms, Countreys, and other inferior things,

things, &c. that had that part of the Zodiack in which the Eclipse falls, for their Horoscope, Mid-Heaven, Sun or Moon, &c. in their Nativities or in the Figure of their first Erection or beginning.

The third Eclipse is of the Sun, and happens on the 12 day of *August*, about 6 of the Clock in the Afternoon, in the beginning of *Virgo*, it will be but a very little Eclipse, like that of *February* before mentioned; viz. scarcely one part of twelve obscured, so that I shall mention nothing further of it.

The fourth and last defect will be of the Moon, on *August* the 28, about 6 of the Clock in the Morning, somewhat after the Sun is risen with us, and will therefore not be visible unto us; it is celebrated in the 15 Degree of  $\text{X}$ , and the effects thereof will be chiefly found in, and upon Persons and things living upon, in, or relating to the Sea, Rivers, &c.

The Meridian of this Lunar defect is distant from us towards the West, 6 Hours 58 Digits, or 104 Degrees, 30 Minutes; and it will be seen by such as pass the *Peruvian Ocean*, *Mexicana*, and *Florida*, &c. The beginning will be seen by the Inhabitants of the Kingdom of *Bennin*, *Lybia*, *Barbary*, and by such as sail through the *Mediterranean*, or the German Ocean, &c. The end may be observed by such as Navigate between *Africa* and *Brafile*, near the Islands of *St Martin*, and by such as inhabit (if at the least any such be) *Eriexland*, *Greenland*, &c. And thus much for the Eclipses of this Year, 1672.

The most eminent Actions of this Year are likely to break forth and shew themselves in the Months of *June*, *August*, *September*, *November*, and *December*, accordingly as I have noted them in the preceding Calender. And if any shall esteem me too narrow in my Judgment of this years Actions, I shall desire

desire them seriously to consider, and peruse what I have written in the several Months, wherein I have been as plain as was fitting, although not so large as the Rules of Astrology would afford me; but my desire is neither to amuse either Nations or Persons, nor yet to flatter or sooth them; the middle way being the certamest for the discovery of Truth in any Science, especially in that abstruce Learning of the Stars. And so I conclude my Judgements of the whole Year.

*Go now my Book unto the World, and tell  
Them what's to come, be it or ill or well.  
Let Felons fear! thy Message is Divine,  
And the most lib'ral of the Seven doth shrine
